

Shoreland and Floodplain Management is the regulatory responsibility of Dakota County. County permits are required for all building, grading, excavation and vegetation removal in all DNR designated shoreland and FEMA designated floodplain areas.

The location of shoreland or floodplain in relation to construction activities must be verified by the Dakota County Water Resources Department. Please contact Dee McDaniels, Water Resources Technician at 952-891-7024 or dee.modaniels@co.dakota.mn.us for proper verification.
